Executive Summary

Quantifi Partners has been evaluated with an Adjusted EBITDA of \$347,263 and a corresponding valuation multiple of 4.2x, resulting in an implied business value primarily driven by its earnings capability. The overall score for Quantifi Partners stands at a 'C', indicating a moderate performance across critical value drivers. Each of the evaluated value drivers, including financial performance, customer concentration, management team, competitive position, and others, received a 'C' score, reflecting a consistent yet average performance across these areas. This uniformity suggests that while the business is stable, it has significant room for improvement to enhance its valuation. The valuation multiple reflects the potential in the market but also indicates that the current metrics are not fully optimized to realize a higher valuation premium. Improving specific areas could lead to a more favorable valuation multiple in the future.
